Noise Limit – 108 dbA measured at 0.5 metres from exhaust pipe at 3/4 max revs

CLASSES

The Race will be made up of 3 classes.

Classes are set by reference laps. The reference lap will be the deciding factor in classification and will be the fastest time set in qualifying.

The "minimum reference lap time rule" is added to increase competition and explicitly not to slow down the cars in this class. Therefore it is the right of the organiser (in order of the sportive character of the event), to adjust the "minimum reference lap time" to a more appropriate level, if the performance of the cars in this class requires this.

Classes will be set after qualifying. (Reference lap times may also be adjusted as above)

Previous lap times set at Castle Combe may be used at the organiser's discretion.

CLASSIFICATION

Class 1: below 1:16.000

Class 2: 1:16.001 and 1:20.000

Class 3: 1:20.001 and above
